

How to implement “Image mapping plugin” into TinyMCE editor

In this instruction we will work from working path (*WP*) = *"/var/opt/intershop/eserver1/share/system/cartridges/sld_enterprise_app/release/static/default/"*.

- 1) From archive, copy folder “*imagemap*” and insert it into: *WP + /tinymce/jscripts/tiny_mce/plugins/*;
- 2) In file : *WP + /htmleditor/(AdvancedEditor.js or BasicEditor.js)*. See screenshot below:

```
apply_source_formatting : true,
content_css : config.styleSheet,
template_external_list_url : config.templateURL,
1 // FULL
plugins : "imagemap,safari,pagebreak,style,layer,table,save,advhr,advimage,advlink,emotions,iespell,inlinepopups,insertdatetime,preview,media,searchreplace,print,contextmenu,paste,
2 // theme options
theme_advanced_buttons1 : "newdocument,template,|,print,|,cut,copy,paste,pastetext,pasteword,cleanup,|,search,replace,|,undo,redo,|,link,unlink,anchor,|,imagemap,image,media,table,
theme_advanced_buttons2 : "bold,italic,underline,striktthrough,|,justifyleft,justifycenter,justifyright,justifyfull,|,bullist,numlist,|,outdent,indent,blockquote,|,forecolor,backco
theme_advanced_buttons3 : "styleselect,formatselect,fontselect,fontsize,select,|,insertlayer,moveforward,movebackward,|,nonbreaking,charmap,advhr,insertdate,inserttime,",
theme_advanced_toolbar_location : "top",
theme_advanced_toolbar_align : "left",
theme_advanced_statusbar_location : "bottom",
3 theme_advanced_resizing : true,
extended_valid_elements : "a[id|name|href|target|title|onclick|class|style],img[usemap|class|src|border=0|alt|title|hspace|vspace|width|height|align|onmouseover|onmouseout|name|sty
entity_encoding : 'raw'"
change
```

– in 1 and 2 selections, just add “*imagemap*” string into appropriate fields;

– in 3 selection change string to:

"a[id|name|href|target|title|onclick|class|style],img[usemap|class|src|border=0|alt|title|hspace|vspace|width|height|align|onmouseover|onmouseout|name|style],hr[class|width|size|noshade],font[face|size|color|style],span[class|align|style],map[name|id],area[shape|coords|href|target|title|alt]" .

- 3) In folder: *WP + /tinymce/jscripts/tiny_mce/themes/advanced/img/*

add file - “*imagemap.gif*” from archive;

- 4) In file: *WP + /tinymce/jscripts/tiny_mce/themes/advanced/skins/intershop/ui.css*

add string : *“.intershopSkin .mce_imagemap{background:url(../img/imagemap.gif) center center no-repeat;}"* ;

- 5) In folder : *WP + /tinymce/jscripts/tiny_mce/plugins/contextmenu/*

replace files “*editor_plugin.js*” and “*editor_plugin_src.js*” from archive’s folder “*Custom_contextmenu*”.
